

You should not allow the NAB to stop XM and other satellite radio broadcasters from broadcasting local sports and weather and traffic. it is a violation of our rights to free speech and our right as americans to not have some big corpate (NAB in this case) decide what we listen to or how we get it. This is a major inovation in satellite and radio and we are proud to have it and cant wait till xm offers regional weather and traffic in the greater kansas city area. DO not let the NAB stop this from happening stop this allow XM to broadcast whatever they want. This is wrong the NAB only wants to proctect it self it does not care about the consumer or americans they only care about themselves. Local radio does not do a good enough job with weather and traffic to justify thier actions in stoping XM from braodcasting local weather and so forth.DO not allow NAB to gain control of this area if it doesnt stop here it never will The NAb and other big corps will take over everything and we will not have choice and i dont know about you but thats what i love about being american is we have choice. choice to do what we want listen to what we want watch what we want go to church where we want.
stop this before it is to late
